Dr. Barry Zallen Joins Benevera Health as Vice President of Population Health and Analytics

(BEDFORD, NH) -- Dr. Barry Zallen has joined Benevera Health as Vice President of Population Health and Analytics. With more than 30 years of experience as a Physician Executive, Dr. Zallen will provide expertise in value-based care, Accountable Care Organization (ACO) development, and innovative care delivery models.

Most recently, Dr. Zallen was an executive at Evolent Health in Arlington, VA, where he helped health systems succeed at improving the quality of care and lowering costs. Previously, Dr. Zallen held leadership positions at Boston Children's Hospital and Blue Cross Blue Shield of MA, and served as a Health Center Director and Pediatrician at Harvard Vanguard Medical Associates.

"We're excited to welcome such a mission-driven leader to our team," said Corbin Petro, Benevera Health's President & CEO. "By working with health insurers and physician organizations, Dr. Zallen understands our business and stakeholder viewpoints. His leadership in pioneering new care delivery models and use of analytics will be instrumental to the next phase of our growth."

Dr. Zallen holds a B.A in Biology from Brown University and an M.D. from The Feinberg School of Medicine at Northwestern University in Chicago. He currently resides in Wayland, MA.

About Benevera Health

Benevera Health is a technology-enabled services company focused on population health and person-centric healthcare. Created from a health insurer/provider joint venture, Benevera Health provides tools and resources to support value-based care including analytics, risk and insurance strategy, and locally-based care coordination and patient engagement services. Additionally, Benevera Health facilitates Harvard Pilgrim Health Care (HPHC) and four hospital systems in NH (Dartmouth Hitchcock, Elliot Health System, Frisbie Memorial Hospital, and St. Joseph Hospital). The unique health insurer/provider risk model brings physicians into the health insurance business and more closely aligns the health insurer with care delivery.
